Lightfastness Rating +++ = excellent ++ = very good + = fair 0 = poor - = fugitive
The Extender (ESP-00) is available in the 50 and 88 set and open stock.

This color chart is produced within the limitations of color printing and differs from the actual colors slightly.

Specialist[®]

Artist Quality Oil Pastels

Cray-Pas Specialist oil pastels are the perfect medium for all professional artists. Invented in 1925 by Sakura, oil pastels are the versatile, dynamic and expressive medium chosen by artists of all ages. Our finest quality, Cray-Pas Specialist, has been specifically developed and formulated to meet the demanding performance standards of the professional artist.

Cray-Pas Specialist is renowned for the following characteristics:

- Bright, vivid and exceptional color intensity and luminosity
- Excellent overall light-fastness rating with each color rated individually
- Extremely smooth and soft body texture is easy to apply
- Extra fine pigments used in high concentrations
- Excellent extension of all colors for subtle shades and blending
- Well balanced assortment, including fluorescents and our new extender

Available in sets of 12, 25, 36, 50, and 88 pieces. All colors and extender are available individually by open stock.

We have formulated Cray-Pas Specialist to be used in combination with a variety of painting mediums, such as glazing and wash techniques. Create impressive impasto effects by building up the color, experiment with the extender to develop subtle hues - great for shadows and depth.

We designed a versatile square shape preferred by professionals, needed for detailed work or large area coverage.

Introduced by Sakura, the Cray-Pas “extender” is a colorless oil pastel which enables further extension of any Specialist color for infinite continuation of color hues.

Cray-Pas Specialist series is certified by ACMI (Art & Creative Materials Institute).

Conforms to ASTM D 4236
